

GOOD NEWS!

Scitation

<http://scitation.aip.org>

*is available for SUNO
researchers (On-Campus Only)*

“WE HAVE FULL SCITATION ACCESS, which includes free use of Scitation's search engine and site-personalization tools” thru a simple registration process...

No password or user ID required unless you choose to create an account to save your personal searches

A number of the most heavily used journals published by the American Institute of Physics are available in full-text for researchers via the SCITATION and SPIN databases. At the Scitation web site, access is also offered to SPIN with any AIP subscriptions.*

“Discover more than one million documents from scholarly journals, magazines, conference proceedings, and other special publications from prestigious scientific societies and technical publishers.”

What is the SPIN database?

“AIP's SPIN (Searchable Physics Information Notices) database includes bibliographic records and abstracts for more than 1.5 million articles from major physical science journals, magazines, and conference proceedings published by the American Institute of Physics, its member societies, and other affiliated organizations. The SPIN database differs from Scitation in that it includes articles that are hosted on other online platforms”

*SUNO has subscriptions currently to some included journals, and therefore qualifies for free access to SPIN, with full-text from those subscriptions.
