

# **Southern University at New Orleans**

## **First Aid Policy**

Southern University's Student Health Center (University Center Room 232) functions as the primary source of temporary first aid. Employees should proceed to the Student Health Center for medical attention after a minor accident or injury if they are ambulatory. Medical treatment not considered minor first aid will be advised to seek medical treatment from a health care provider. Please note that the Student Health Center should only be used for workplace injuries and does not treat injury or illnesses not work related.

Serious medical conditions and workplace accidents require advanced treatment and will be handled by Orleans Parish EMS. Please dial 911 immediately and stay on the line with the operator. If possible it is also advised that Campus Police be called at 504-286-5290 to help facilitate the dispatch of the responding units.
